

Transportation Priorities

What transportation priorities are most important to you when looking ahead to the next 25 years in Arkansas?

Use your stickers to indicate your top priorities below.

Maintain current transportation system assets

Increase bicycle/pedestrian options

Expand highways by adding lanes or constructing new routes

Make safety improvements such as adding shoulders or improving signing/striping

Increase rural public transit options

Improve local land use coordination

Increase urban public transit options

Increase the number of intermodal connections (e.g. truck to rail or barge to rail)

Improve freight infrastructure (e.g. rail, ports, waterways)
